No 9 (September) pp 601–674
No 10 (October) pp 675–740
No 11 (November) pp 741–802
No 12 (December) pp 803–912

Article Index

January

An accelerated triangulation method for computing the skeletons of free-form solid models
G. M. Turkiyyah, D. W. Storti, M. Ganter, H. Chen and M. Vimawala 5

On the determination of starting points for parametric surface intersections
K. Abdel-Malek and H.-J. Yeh 21

Towards multiprocessor feature recognition
W. C. Regli, S. K. Gupta and D. S. Nau 37

Determining fabrication orientations for rapid prototyping with stereolithography apparatus
P.-T. Lan, S.-Y. Chou, L.-L. Chen and D. Gemmill 53

Using Monte-Carlo variance reduction in statistical tolerance synthesis
V. J. Skowronski and J. U. Turner 63

Comparison of discretization algorithms for NURBS surfaces with application to numerically controlled machining
S. P. Austin, R. B. Jerard and R. L. Drysdale 71

February

Special Issue: Solid modelling
Guest Editors: Christoph Hoffmann, Purdue University and Jarek Rossignac, IBM Research

Non-local blending of boundary models
I. C. Braid 89

Inferring 3D models from freehand sketches and constraints
L. Eggli, C-y. Hsu, B. D. Brüderlin and G. Elber 101

A mechanism for persistently naming topological entities in history-based parametric solid models
J. Kripac 113

Polyhedral modelling with multiprecision integer arithmetic
S. Fortune 123

Robust algorithms for face-based representations
M. Higashi, F. Torihara, N. Takeuchi, T. Sata, T. Saitoh and M. Hosaka 135

Kinematic tolerance analysis
L. Joskowicz, E. Sacks and V. Srinivasan 147

Assembly sequencing with toleranced parts
J.-C. Latombe, R. H. Wilson and F. Cazals 159

March

A cell-based approach for generating solid objects from orthographic projections
H. Masuda and M. Numao 177

Smooth interpolation between two polylines in space
F. Lazarus 189

Geometric aspects of the mouldability of parts
K. C. Hui 197

Non-manifold modelling: an approach based on spatial subdivision
P. R. Cavalcanti, P. C. P. Carvalho and L. F. Martha 209

Nesting of two-dimensional irregular parts using a shape reasoning heuristic
H. Lamousin and W. N. Waggenspack, Jr 221

A classified bibliography of literature on NC milling path generation
D. Dragomatz and S. Mann 239

April

Special Issue: Reverse engineering of geometric models
Guest Editors: Tamás Várady, Hungarian Academy of Sciences, Ralph R. Martin, University of Wales and Jordan Cox, Brigham Young University

Reverse engineering of geometric models—an introduction
T. Várady, R. R. Martin and J. Cox 255

Surface reconstruction: from points to splines
B. Guo 269

Three-dimensional object reconstruction from two-dimensional images
A. P. Rockwood and J. Winget 279

Static polyhedron simplification using error measurements
P. Véron and J. C. Léon 287

Segmentation of a wrap-around model using an active contour
M. J. Milroy, C. Bradley and G. W. Vickers 299

High-level CAD model acquisition from range images
A. W. Fitzgibbon, D. W. Eggert and R. B. Fisher 321

May

Parametric kinematic tolerance analysis of planar mechanisms
E. Sacks and L. Joskowicz 333

Modelling turned components with non-axisymmetric features
A. R. O. Guerra and S. Hinduja 343

Symbolic operators for NURBS
L. Piegl and W. Tiller 361

Matching of freeform curves
S. Cohen, G. Elber and R. Bar-Yehuda 369

Robust computation of the rotation minimizing frame for sweep surface modeling
W. Wang and B. Joe 379
Integration of feature based design and feature recognition
J. Han and A. A. G. Requicha 393

June
A C^2 triangular patch for the interpolation of functional scattered data
L. H. T. Chang and H. B. Said 407
Geometric construction for setback vertex blending
T. Varady and A. Rockwood 413
Manufacturing feature determination and extraction—Part I: optimal volume segmentation
J. Dong and S. Vijayan 427
Global error bounds and amelioration of sweep surfaces
G. Elber 441
Moving a B-spline surface to a curve—a trimmed surface matching algorithm
Y.-P. Hu and T.-C. Sun 449
Geometric representation of the swept volume using Jacobian rank-deficiency conditions
K. Abdel-Malek and H.-J. Yeh 457
Higher-order Bézier circles
J. Sánchez-Reyes 469

July
Manufacturing feature determination and extraction—Part II: a heuristic approach
J. Dong and S. Vijayan 475
Energy and B-spline interproximation
X. Wang, F. Cheng and B. A. Barsky 485
Case-based design for assembly
G. J. Kim 497
Admissible tool orientation control of gouging avoidance for 5-axis complex surface machining
Y.-S. Lee 507
Recognizing $2\frac{1}{2}$D shape features using a neural network and heuristics
K. Nezis and G. Vosniakos 523

August
Special Issue: Virtual reality
Guest Editor: Sankar Jayaram, Washington State University

ISAAC: a meta-CAD system for virtual environments
M. R. Mine 547
Creation of concept shape designs via a virtual reality interface
T. H. Dani and R. Gadh 555
Virtual reality interfaces for feature-based computer-aided design systems
S. N. Trika, P. Banerjee and R. L. Kashyap 565
Virtual assembly using virtual reality techniques
S. Jayaram, H. I. Connacher and K. W. Lyons 575
Prototyping and design for assembly analysis using multimodal virtual environments
R. Gupta, D. Whitney and D. Zeltzer 585

September
Pythagorean-hodograph quintic transition curves of monotone curvature
R. T. Farouki 601
Analysis and synthesis of geometric models using tree-structured relations
P.-L. Tsai, C.-C. Fu and W.-H. Chieng 607
Robust interval algorithm for surface intersections
C.-Y. Hu, T. Maekawa, N. M. Patrikalakis and X. Ye 617
The sweep-envelope differential equation algorithm and its application to NC machining verification
D. Blackmore, M. C. Leu and L. P. Wang 629
A direct method for the automatic discretization of 3D parametric curves
J. C. Cuillière 639
On estimating the feasible solution space of design
Z. Yao and A. L. Johnson 649
C-space approach to tool-path generation for die and mould machining
B. K. Choi, D. H. Kim and R. B. Jerard 657

October
Design and plane developments of doubly curved surfaces
P. Azariadis and N. Aspragathos 675
Resolving feature interactions in 3D part editing
D.-B. Perng and C.-F. Chang 687
Modeling the assembly of compliant, non-ideal parts
M. Chang and D. C. Gossard 701
Multi-sensory user interface for a virtual-reality-based computer-aided design system
C.-C. P. Chu, T. H. Dani and R. Gadh 709
A simple visualization tool to support concurrent engineering design
S. C. Lu, A. B. Rebello, R. A. Miller, G. L. Kinzel and R. Yagel 727

November
An integrated system for NC machining of multi-patch surfaces
R. Sarma and D. Dutta 741
Optimal circular arc interpolation for NC tool path generation in curve contour manufacturing
H. Qiu, K. Cheng and Y. Li 751
Automatic extraction of form features for casting
P. Di Stefano 761
A robust point inclusion algorithm for regions bounded by parametric curve segments
K. C. Hui 771
The general B-spline interpolation method and its application to the modification of curves and surfaces
J. Ishida 779
Approximation of measured data with interval B-splines
S. T. Tuohy, T. Maekawa, G. Shen and N. M. Patrikalakis 791

December
Solid modeling of 4-axis wire EDM cut geometry
C. Liu and D. Esterling 803
Dynamic interfacing of applications to geometric modeling services via modeler neutral protocol
J. J. Shah, H. Dedhia, V. Pherwani and S. Solkhan 811
Computing planar swept polygons under translation
K. Tang, M.-E. Wang, L.-L. Chen, S.-Y. Chou, T. C. Woo and R. Janardane 825
Die-cavity pocketing via cutting simulation
B. K. Choi and B. H. Kim 837
A virtual prototyping approach to product disassembly reasoning
Z. Siddique and D. W. Rosen 847
A new convex-hull based approach to evaluating flatness tolerance
M.-K. Lee 861
Selection of an optimal set of cutting-tool sizes for $2\frac{1}{2}$D pocket machining
D. Veeramani and Y.-S. Gau 869
Finding the maximum turnable state for mill/turn parts
D. Yip-Hoi and D. Dutta 879
A repository for design, process planning and assembly
W. C. Regli and D. M. Gaines 895

PII: S0010-4485(98)00003-7
